

Elmo Motion Control Introduction

Haim Monhait, CEO

Welcome to Elmo Motion Control

Elmo products have been integrated by leading machine manufacturers around the globe in a wide variety of challenging industries and applications where performance, precision and consistency of operation are paramount.

We look forward to partnering with you.

About Elmo:

Founded in 1988, Elmo Motion Control is an innovative provider of feature rich motion control products for machine manufacturers.

Elmo designs, produces and markets network-based motion controllers, intelligent digital servo drives and highly efficient servo amplifiers for both brush and brushless motors. Elmo's drives offer the highest power density in an extremely compact package. The company's product offering is divided into two major product families: **SimplIQ** for general purpose motion control applications and **ExtrIQ** for applications operating under extended environmental conditions.

Elmo's innovative **SimplIQ Motion Control Technology** is incorporated into its digital servo drives and provides a wide range of motor feedback options, programming capabilities and communication protocols. Elmo's solutions support single and multi-axis control applications.

Applications Solutions:

SimplIQ Applications

- Robotics
- Semiconductor production
- Lab automation
- Electronic assembly
- Entertainment
- Machine tools
- Packaging
- Wood processing
- Textiles
- Medical and pharmaceutical instruments
- Printing/Converting
- Sorting
- Material handling

ExtrIQ Applications

- Military ground mobile
- Naval
- Nautical
- Avionics
- Aerospace
- Missile weaponry
- Specialized laboratory automation
- Oil refining
- Unmanned vehicles
- Satellite communication
